

BREATHING NEW LIFE INTO INHALATION R&D

The latest medical and business news from Inhalation Sciences

Welcome to a regular roundup of business and medical news from ISAB. Find out how we're breathing new life into inhalation R&D.

1

ASTRA ZENECA TO RELEASE NEW RESEARCH FROM PRECISEINHALE AT AIT COPENHAGEN, OCTOBER 26 - 27

Astra Zeneca will release data achieved using PreciseInhale in a poster at the Association of Inhalation Toxicologists (AIT) conference. Astra Zeneca already began using PreciseInhale in its research in Summer 2017, prior to ISAB's announcement on Sept 27 that the company had decided to purchase PreciseInhale outright. The AIT poster will show data from the collaboration.

UNIVERSITY OF COPENHAGEN INSTALLS PRECISEINHALE FOR RESEARCH INTO NEW INHALED TB THERAPIES

The Department of Pharmacy's Group Leader, Associate Professor Camilla Foged, said: "Installing PreciseInhale in our labs is an important milestone for us. It will allow us to advance our state-of-the-art nanomedicines towards first-in-man studies. The aim of our research is to design a new thermostable, dry powder-based and inhalable vaccine against tuberculosis, and a nanoparticle-based anti-inflammatory formulation for the treatment of chronic obstructive pulmonary disease."

CHIESI RELEASES POSITIVE TEST RESULTS FOR PRECISEINHALE

A new research paper from Chiesi Farmaceutici S.p.A. ('Chiesi') found PreciseInhale performed with "accuracy higher than usual techniques". Published in the Journal of Aerosol Medicine and Pulmonary Drug Delivery, the paper shows how PreciseInhale gives crucial pharmacokinetic data on new treatments early on in the preclinical phase of development.
